

# PRINCIPAL

The David Scott School was established in 2017 by the Brotherhood of St Laurence to deliver an individualised senior secondary education to young people who are marginalised from mainstream educational settings as a consequence of complex personal circumstances. Located in Frankston, the School delivers the Victorian Certificate of Applied Learning, and serves approximately 120 students, with a multidisciplinary staff of over 40.

The School has an innovative educational model that aims to ensure students are inspired to reach their potential and prepared to live constructive, socially connected and personally satisfying lives.

The School seeks to appoint its second Principal, following the wonderful contribution over the last five years of Catherine Arnold, the inaugural Principal. This role offers an exciting opportunity for an outstanding and innovative educational leader who is committed to positively influencing the lives of young people living with disadvantage at a time when the School seeks to further develop its campus.

The successful applicant will have demonstrated experience and proven ability to work collaboratively to:

- Enhance and sustain a strong, collaborative, inclusive, supportive and safe learning culture
- Clearly articulate a vision which will carry forward the strategic intent of the School
- Foster research-informed innovation across the full spectrum of a school's activity
- Build quality relationships with students that empower them to reach their potential and equip them for life
- Build and develop a successful and harmonious team
- Implement systems and structures that ensure effective resourcing, management and development within a school or other educational setting
- Advocate and influence effectively at a policy and system level

This exceptional opportunity will appeal to an energetic and dedicated educational leader who has a personal passion for student education outside a mainstream setting. The successful applicant will lead the further development of an alternative educational model by engaging in collaborative research. An attractive remuneration package applies.
